## V. AGRICULTURAL OPERATIONS

During the reporting week, the state received a cumulative rainfall of 80.7 mm, ranging from 19.6 mm in Gadwal District and 291.2 mm in Kamareddy District, spread over 7 rainy days.

These timely rains have played a crucial role in alleviating moisture stress in rainfed crops. Currently, the crops sown are at the vegetative growth stage to reproductive stage, and overall crop condition is reported to be healthy. Inter cultivation and top dressing of

fertilizer operations are in progress. Paddy is in nursery to active tillering stage and transplanting and inter-cultivation operations are in progress across the state. Farmers are advised to adopt balanced fertilizer use for a healthy crop and IPM practices to manage pests and diseases.

As per the IMD's forecast of light to moderate rainfall in a few places and heavy rains in certain districts, farmers are advised to ensure adequate drainage in the fields to prevent inundation and associated crop damage and to:

- Stay away from electric poles, power lines, and water bodies.
- Avoid standing under trees and prevent livestock (cattle, sheep, goats) from taking shelter under trees during such conditions.

Further, in areas experiencing excess soil moisture, rainfed crops (such as cotton, millets, pulses, and oilseeds) may face difficulty in absorbing nutrients from the soil. Therefore, once the rains subside, it is advised to spray:

- Multi K (13-0-45) or
- Polyfeed 19-19-19 or
- Urea @ 10 grams per litre of water to support crop recovery and promote healthy growth

#### CROP CONDITION, PESTS AND DISEASES OF MAJOR CROPS DURING VANAKALAM-2025

| Sl. | 6.  | Blackgram | Vegetative stage                                 | - | -                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 7.  | Groundnut | Vegetative stage                                 | - | -                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 8.  | Soyabean  | Vegetative and flowering to pod elongation stage | - | Prevailing weather conditions are congenial for the incidence of Stem Rot in Soybean. To control soil drench with Copper-Oxy-Chloride @ 3 g or Carbendazim @ 1 g per litre of water.                                                                                                                                                                                                                                                                               |
| 9.  | Castor    | Sowings to vegetative                            | - | -                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 10. | Cotton    | Seeding to boll development stage                | - | Drain out excess water from the fields and go for the Intercultivation as early as possible under optimum soil moisture condition. • Prevailing excess moisture/water logged conditions are congenial for the incidence of Para Wilt in cotton. After cessation of rains, soil drench with Copper-Oxy-Chloride @ 3 g per litre of water twice at weekly interval and foliar spray of Multi-k (13:0:45) or Urea @ 10 g per litre of water twice at weekly interval. |

# ANNEXURE - I

## DISTRICT WISE AVERAGE RAINFALL FOR THE PERIOD FROM 01.6.2025 TO 28.8.2025 (Rainfall in MM)
